HerzIQ® Transformation

“It is only with the heart that one can see rightly .“
Antoine de Saint-Exupery

“If we start to feel with the head and to think with the heart, we can change the world.“

“Our heart. Some say it ist the place for great emotions.

Others look at it more objectively and describe it as a muscle in the size of a fist, which decides like a motor the rhythm of our life by day and by night.“

“The heart can only beat for something, never against it.“

... the question is, whether your heart can participate in your knowledge and your perception or not.

The heart is made for solicitousness, for the positive, then it will start to beat and even to jump.

I wish you, that you will “hear“ from time to time into which direction your heart beats and that you will follow this way.

Prägungen & Arbeitsweise

My working method

My multidisciplinary, resources and solution-oriented working method includes elements from the breath and bodywork, Gestalt therapy and Psychodrama as well as systemic approaches and NLP (Neuro-linguistic programming), meditation and energy work. Thereby I apply whatever is necessary to support the respective processes.

My imprinting through the intensive examination of humanistic and eastern philosophies and forms of therapy have decisively affected my self-image and my impulse-work with people.

I received important impulses from

- the system theory and from Peter F. Drucker, Daniel Goleman, Leo A. Nefiodow, of the most respected mentors of the information society, who is brought to mind in today's crisis.
- Humanistic philosophies and therapies e.g. from Perls, Maslow; Rogers, Ellis, Satir
- Wisdom and philosophies from the Buddhism, TCM, Thorwald Dethlefsen, Rüdiger Dahlke, Alice Bailey
- the Dalai Lama, Sogyal Rinpoche, Maslow and others in my humanistic, open philosophy
- Dethlefsen, Dahlke and others have changed my perception of illness and personal responsibility.
- With Jean-Claude Killy and others I have the curiosity as the moving spirit in common;
- Sergio Bambaren, Antoine de Saint-Exupéry

If my working methods are appealing to you, I would be pleased to get to know you. Please just call me:
